

# AIR & SURFACEPRO

This small but powerful air purifier uses ActivePure® Technology to eliminate smoke, odors, and other contaminants in the air.

## WHAT'S POLLUTING YOUR HOME?

- Poor outdoor air quality
- Garbage cans
- Athletic clothing
- Mold spores and pollen
- Cooking odors
- Pets

## WHAT IT DOES

- Reduces airborne and surface contaminants
- Removes odors and freshens air
- Removes dirt and dust from the air
- Uses a UVC light to oxidize and ionize the air
- Provides ozone-free air and surface cleaning

## SO WHAT IS ACTIVEPURE® TECHNOLOGY?

ActivePure® Technology is based on technology originally developed by NASA for use during space travel. Now, it can be used in your own home to reduce up to 99% of airborne and surface contaminants such as allergens and bacteria.

*In 2017, ActivePure® Technology was inducted into the Space Technology Hall of Fame by The Space Foundation.*

## HOW ACTIVEPURE® WORKS

ActivePure works by harnessing microscopic oxygen and water molecules in the air and then forcing them through a honeycomb-like matrix inside the Vollara Air & Surface Pro. While inside the matrix, the molecules are transformed into safe-yet-powerful oxidizers that are then released back into the air to seek and destroy contaminants like mold, fungi, and odor.
